WE ARE ALL AMERICANS There seems to be a tendency on the part of states and munici-

There seems to be a tendency on the part of states and municipalities to discriminate against people from other communities which should be of unusual value, a consideration of the Ten Commandments in the light of the teaching this tendency is, and how far its serves its avowed purpose of benefiting the "old" residents and businesses of the communities which discourage the inflow of new blood we have no means of knowing. But in even the slightest degree it seems like a dangerous and un-American trend.

There seems to be a tendency is, might,—Deuteronomy 6:3.

Today we begin a series of studes which should be of unusual values of the teaching of Jesus and related New Testament passages. It is appropriate to point out that, far from being outmoded, the Ten Commandments are really the basis of all moral law. They need a diligent re-study and we have no means of knowing. But in even the slightest degree it seems like a dangerous and un-American trend.

There seems to te discriminate against people from other communities which should be of unusual values as excess of studes which should be of unusual values as excess of studes of the Ten Commandments are read this tendency is, and how far it serves its avowed purpose of benefiting the "old" residents and businesses of the communities which should be of unusual values. The Coffee County Fair Association has passed a ruling darker in the Suble best of sweet potatoes. Best 10 stalks of sugar cane. Best three stalks of sugar cane. Best three stalks of son dollar.

Red Letter Days

IF You Want Your Paper To **Keep Coming**

We have on our mailing list a large number of subscriptions that run out during the months of September and October, and just a few that ran out in August. We would like to continue mailing these papers every week, but unless we have renewals right away will be forced to stop every one.

First place, we need the money to help buy paper, pay postage, labor and the other things necessary in producing the paper. Second place, it is a violation of Postal Rules and Regulations for us to continue sending out papers which have not been paid for. Third place, our subscription terms are CASH IN ADVANCE and we must have the money or else stop the paper.

Within the next few days you will receive a card showing the exact date of your subscription expiration. However, you can look at the mailing label on this paper and tell when your time is out.

We hate to drop names from our list, but if you do not renew your subscription we will have to stop the paper.

Attend to this NOW before your paper stops.

"And about three-quarters of what was stolen back from Sayres through Crowell—is that it?"

MARVELS THAT KEEP YOUR ELECTRIC SERVICE DEPENDABLE "In a recent series of advertisements, I told you about some of the industry which utilize or combat the forces of Nature so your electric service will be the best you can get for the

Electrical "Measuring Spoons"

NIO SALESMAN will try to sell you an "electrical measuring spoon" for your kitchen -because it isn't a kitchen gadget. But it does have a lot to do with the dependability of the electric service you use for cooking, lighting, refrigeration and other household, commercial and industrial purposes.

All electrical equipment, even including lamp bulbs, is designed to use a voltage which must be kept within certain limits if the device is to operate satisfactorily. Here is where the "electrical measuring spoon" does its work. Engineers don't call it that, but a "regulator." The ordinary measuring spoon used in the kitchen will hold only so much of the ingredient being measured. The line or generator regulator automatically limits or releases the voltage of the electricity coming from the generator and passing over the wires, so that it is always right for use at the switch in your home or business.

In generator and line regulators you have another example of the development and use by private business, of equipment to make your electric service reliable.

The apparatus shown in the photograph was designed to regulate the voltage on wires carrying 54,000 horsepower.

> Note: Since the appearance of the first of these advertisements, we have received requests for copies of the entire series. It is therefore planned, when the series is concluded, to reproduce them in booklet form. Interested persons may have comp copies of the booklet by writing Dept. 319, Alabama
